Delivery: Docker, Git, GitHub, GitLab CI/CD, Vercel, Agile workflows

PROFESSIONAL EXPERIENCE

Programmer
Feb 2026 - Present
Midland Realty
Hong Kong

- Maintain and enhance a large-scale enterprise HR platform **using React, Next.js, TypeScript, Express, BullMQ, Docker and Git.**
- Implemented the IR56F workflow end to end across front-end interfaces**, backend APIs, validation and business process logic**, based on a database design provided by the System Analyst.
- Built the HRD Firsthand eForm for sales staff to record payment details and receipt dates, with a complete HR review and approval workflow.
- Triggered **BullMQ jobs** after approval for SAP synchronisation through a **continuously running Dockerised worker,** then verified successful creation of record through **Postman**.
- Investigate production issues, **maintain existing modules and deliver new features** within an established enterprise codebase.

Frontend Developer
Jul 2024 - Nov 2024
HKNova
Hong Kong

- Translated UI designs into production-ready Vue.js features for a CRM platform.
- Integrated backend APIs and maintained consistent UI behaviour across dynamic application states.
- Delivered feature updates through GitLab CI/CD and collaborated in Agile sprint planning and reviews.
